

"SO....YOU'VE INSTALLED THE
SECURITY SOFTWARE...THINK
YOU'VE COVERED YOUR **POPI**
RISK?"

THE LEAKY BOX....

“Revealed: 30-million ID numbers. Is this SA's biggest data dump?”

In what was considered to be **SA’s biggest data breach**, about **30-million identity numbers and other personal and financial information** had been **hacked and leaked** on the internet, a data security researcher said on Tuesday.

The data dump of about **27 gigabytes contained** a wide range of sensitive information, including people’s **13-digit ID numbers, personal income, age, employment history, company directorships, race group, marital status, occupation, employer and previous addresses.**

How can responsible ITAM/ITAD help prevent a data breach?

Proper controls and due diligence are essential for reducing the risk of a loss of data. Here are the essential elements of security program:

- Perform a **security risk analysis** to identify threats.
- Develop and implement a robust **security policy** that addresses how data on assets is secured and eventually destroyed. Then train staff regularly on the policy.
- Perform due diligence on your ITAD provider. Visit them, verify their controls and/or ensure they are audited by an independent security certification program like NAID.
- Execute and regularly review a service agreement with your ITAD vendor (a BAA is required for Covered Entities)
- Have access to disposition records or Certificates of Destruction - if you are audited, you may need this as evidence your data was properly destroyed at disposition.

THE RISKS – Video Clip

What is ITAD?

IT Asset Disposal is no longer about selling end-of-term hardware to the highest bidder.

Stringent legislation NOW demands environmental compliance, safety of sensitive information and financial and tax compliance. (King 4 requires ITAD to be included in all audits going forward)

/Understanding the risks for losing company data

NEMWA;2008 & PoPIA;2013

- **5-10 Year Criminal Sentencing**
- **R5m – R10m Enforced Penalty**

PLUS...

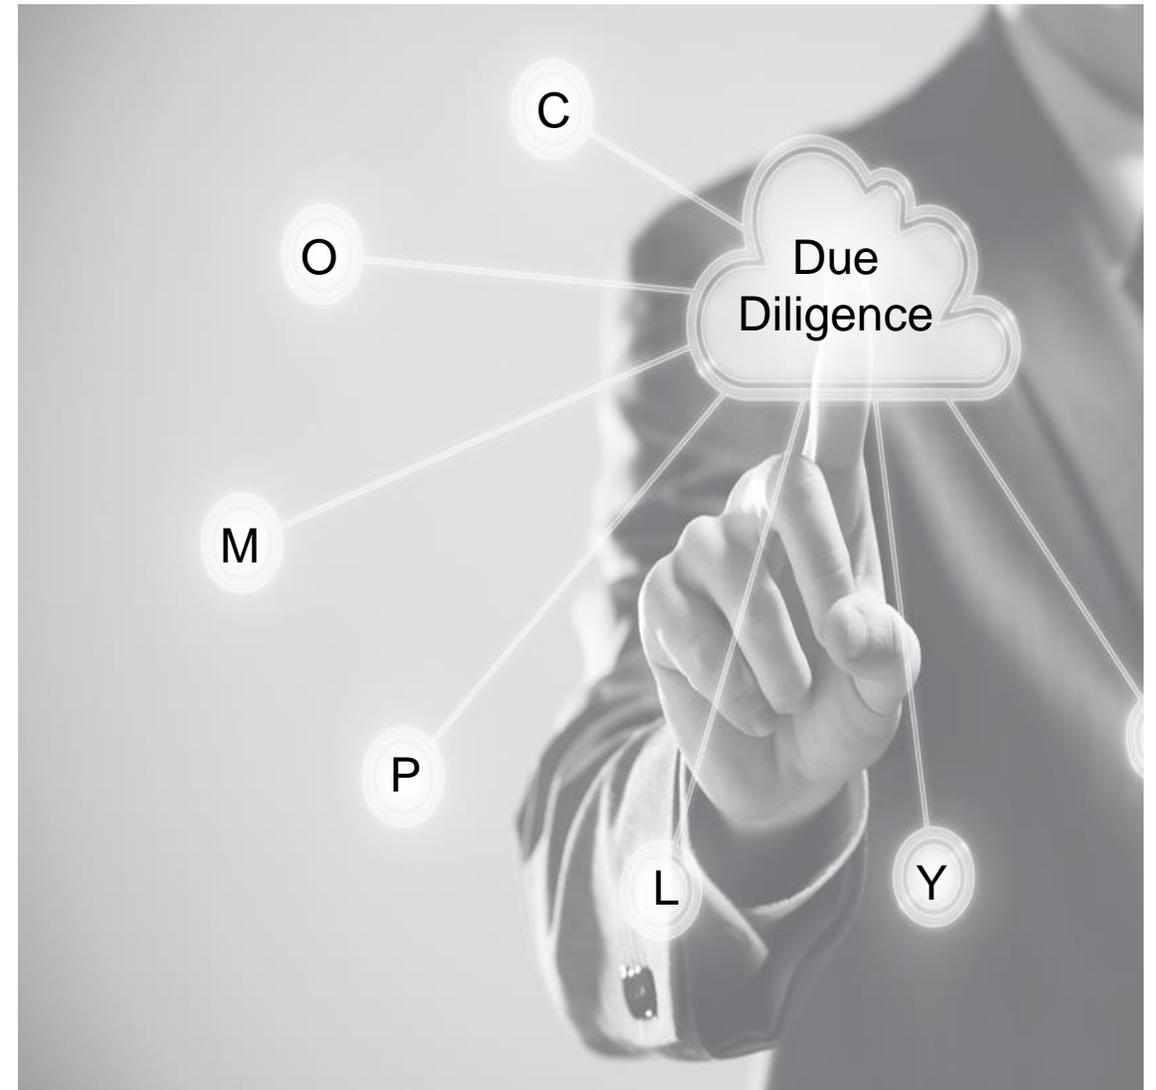

- **MASSIVE REPUTATIONAL DAMAGE (PoPIA)**

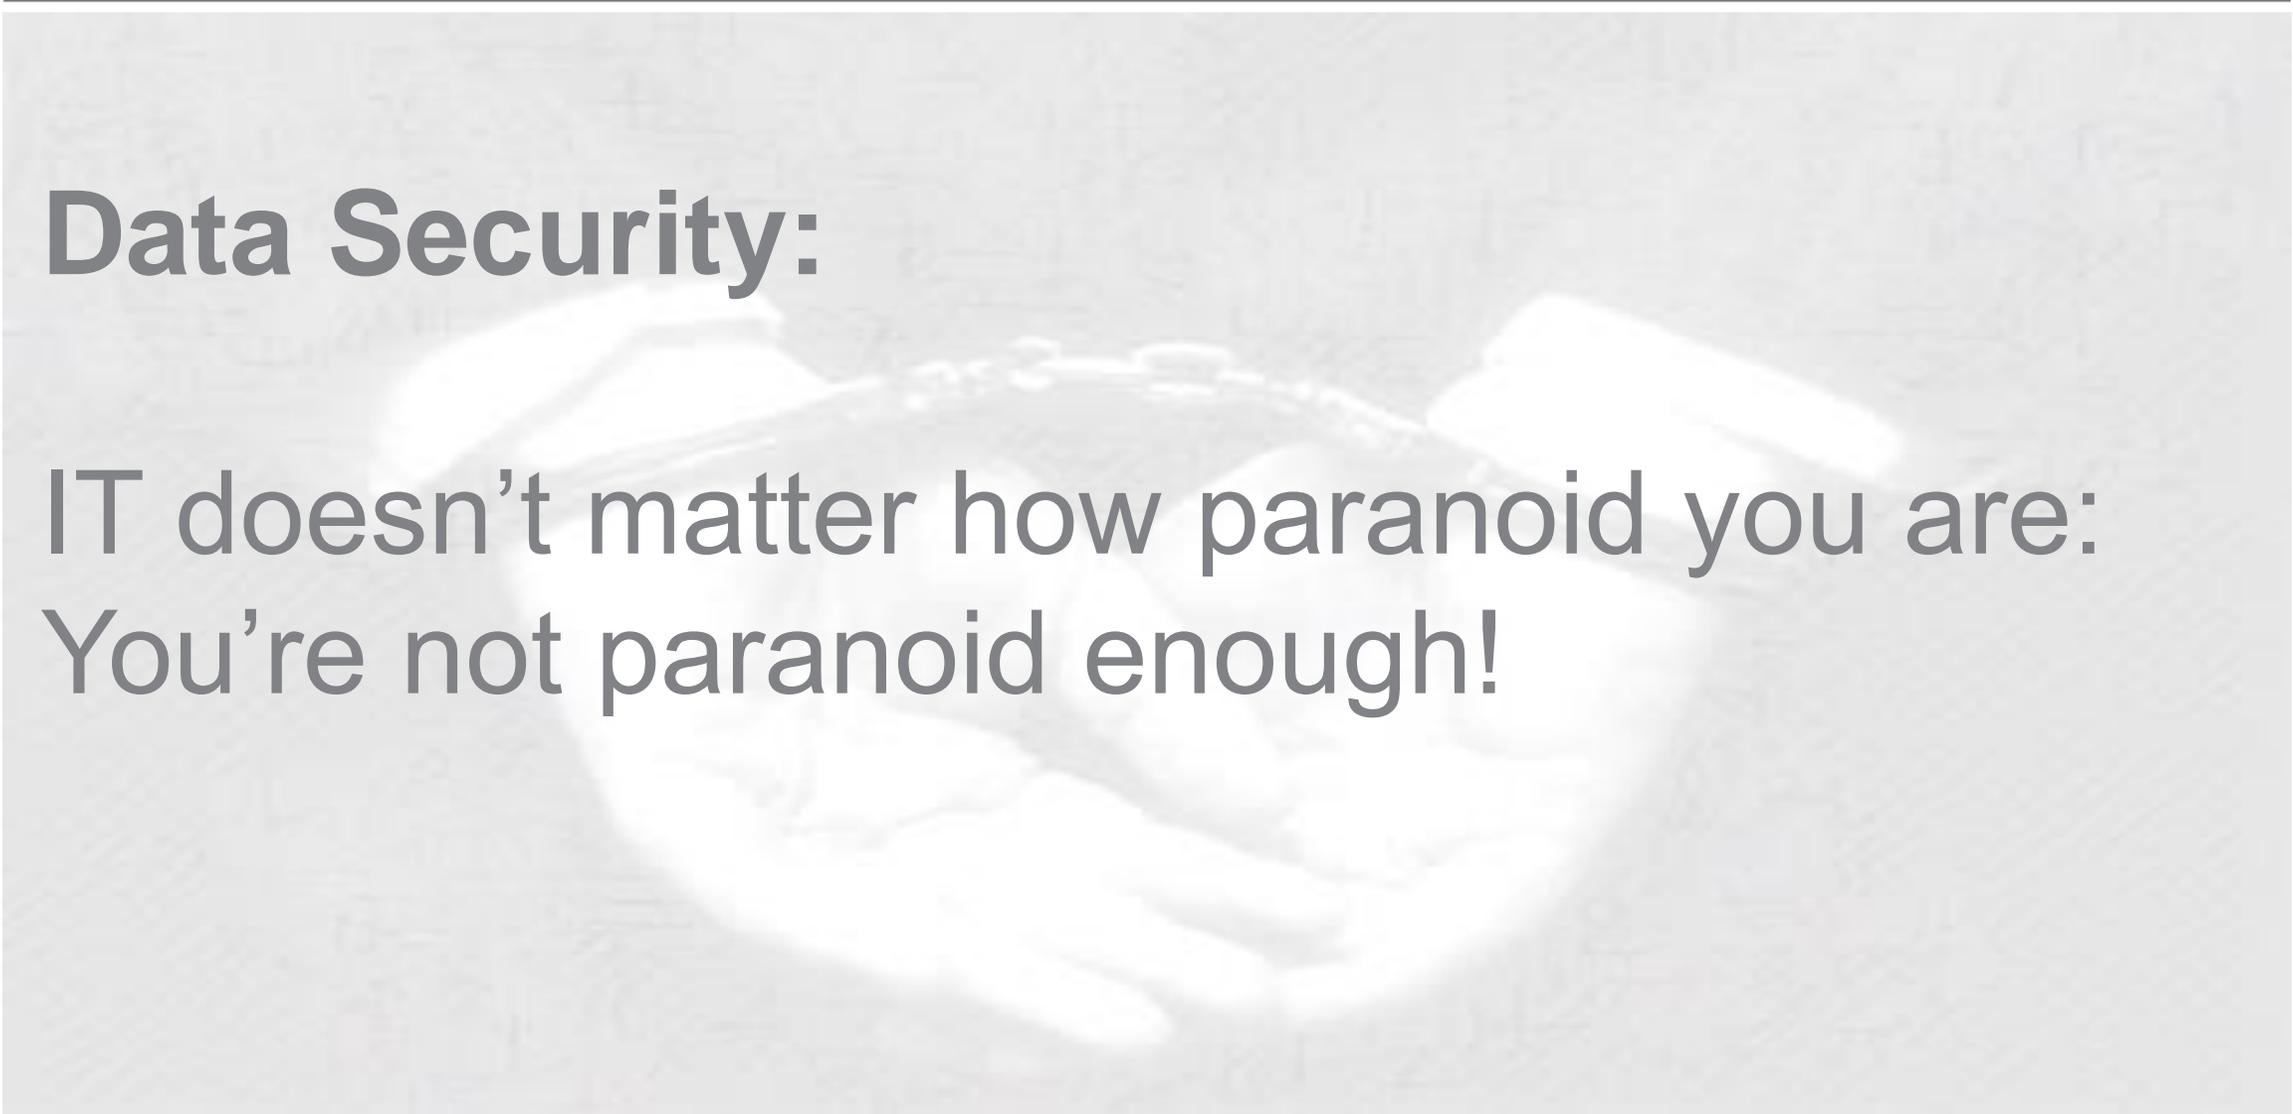

“Offender must make a breach public knowledge by means of mass media”

- 1. National print media**
- 2. Online media**

NB: “NPA’s focus has shifted to the conduct of company directors and the scope for personal criminal liability for environmental degradation caused on their watch”.

Data Security:

IT doesn't matter how paranoid you are:
You're not paranoid enough!

CONFUCIUS SAY...

"Needing an ITAD policy is like needing a parachute. If it isn't there the first time, chances are you won't be needing it again..."

/Your I.T Manager Says....

- **“I have Deleted the files”**
- **“I can just format the hard drive”**
- **“I will just reload your Operating System”**

/What does a true CORPORATE ITAD professional provide....

Assist their customers with an ***auditable*** and ***compliant*** disposal of IT and electronic goods.

They should also help recover ***value*** for the goods, manage complex logistics and provide all the necessary ***compliance with regulations***.

THE POPI CHECKLIST EVERY RISK MANAGER SHOULD HAVE

-
- **Do you keep a record of all processes involving personal information? YES/NO**
 - **Do you ensure Personal Information is stored securely and safely (email, share drives, paper, social media, voice recordings, cctv cameras, hard drives, systems etc)? YES/NO**
 - **Have you formally let your Data Subjects know the purpose of collecting their personal information? YES/NO**
 - **Do you have policies and processes in place to enforce the destruction/deletion/de-identification of obsolete Personal Information (in accordance with a documented retention schedule)? YES/NO**
 - **Do you ensure that any processing done on your behalf by an operator is POPIA compliant? YES/NO**
 - **Have you appointed an Information Officer with defined roles and responsibilities? YES/NO**
 - **Do you know which staff have bought which unit on the staff scheme and what information was removed? YES/NO**
-

/Covering your ITAD RISK is no longer an optional extra

▶ [tarsus_dispose-IT](#) /[itad_reseller_partnership](#)
2016

THE KEY NEXT STEPS FOR YOU TO ADDRESS

1. Bring in an ITAD/POPI consultant and devise an ITAD policy for your business
 - Identify existing customer information and who has access to it.
 - Review the processes - collect and process personal information.
 - Compare your company's privacy policy with POPI's requirements
2. Ensure your IT and Procurement teams are trained and functional
3. Train your Finance and Admin teams for forthcoming audit processes
4. Engage with a COMPLIANT ITAD service provider

And.....

Do not tolerate deviations from your ITAD policy..... **EVER**

Thank you!
